Two or three things that India must address urgently to develop a world class healthcare system:

1. **Addressing the talent pool issue:**
   - India must identify and develop the necessary cadre of medical professionals to ensure a robust healthcare system. This includes attracting students to medical colleges and nursing schools, and ensuring they are well-equipped to handle the challenges of modern medicine.

2. **Technological advancement:**
   - India has the potential to become a global leader in medical technology and innovation. The government should encourage research and development in areas such as biotechnology, artificial intelligence, and nanotechnology.

3. **Affordable healthcare for all:**
   - Ensuring that healthcare is accessible to all citizens, regardless of their income level, is crucial. This can be achieved through a combination of public and private initiatives, including universal health coverage and affordable insurance options.

**KEY TAKEAWAYS**

- To celebrate Azadi Ka Amrit Mahotsav, India@75 Foundation is organizing a series of conversations that will bring together leaders and thinkers from various fields to discuss India’s past, present, and future.
- Dr Devi Prasad Shetty, Chairman & ED Narayana Health, will be sharing his vision on how India can become a global leader in healthcare.
- The event will be moderated by Rajan Navani, Chairman, CII India@75 Council.

**Overview of the conversation that touched upon issues such as affordable healthcare and Rajan Navani, Chairman, CII India@75 Council.**

We bring you an overview of the conversation that touched upon issues such as affordable healthcare and Rajan Navani, Chairman, CII India@75 Council.

**Rajan Navani: Addressing Challenges in India’s Healthcare System**

- India must address the issue of affordable healthcare. The current system is not only cost-prohibitive for many, but also lacks the necessary infrastructure to provide quality care.

- There is a need for a self-reliant nation. Self-reliance especially in terms of technology is crucial, as technology developed for defence can be adapted for healthcare.

- India has vast potential in medical technology and innovation. Many IITs, for example, have developed prototypes that can be used in healthcare.

- Access to affordable care is crucial. When people can afford the cost of treatment, it leads to better outcomes.

- There is a need to focus on preventive care. This includes initiatives such as early detection and regular check-ups.

- India has a unique opportunity to become a global leader in healthcare. It must make strategic investments in research and development.

**Chairman & ED Narayana Health, Dr Devi Prasad Shetty shares his wish list for the India of 2047.**

- Shetty stresses the importance of investment in technology and innovation. He believes that India has the potential to lead the world in medical technology.

- He highlights the need for a strong focus on research and development. This includes investing in areas such as biotechnology and nanotechnology.

- Shetty also emphasizes the importance of affordable healthcare. He believes that everyone should have access to quality healthcare.

- He talks about the potential of India in medical tourism. He believes that with the right policies and infrastructure, India can become a global leader in medical tourism.

**How can we achieve these aims?**

- By investing in education and training programs. This includes providing scholarships and grants to medical students.

- By encouraging research and development. This includes providing funding for medical research and development.

- By focusing on preventive care. This includes initiatives such as early detection and regular check-ups.

- By ensuring that healthcare is affordable. This includes establishing affordable insurance options.

- By focusing on technology and innovation. This includes investing in areas such as biotechnology and nanotechnology.

**What is the future of healthcare in India?**

- It is essential to develop a comprehensive healthcare system that is accessible to all.

- It is also crucial to focus on preventive care and early detection.

- Technology and innovation will play a key role in shaping the future of healthcare in India.

- It is important to ensure that healthcare is affordable and accessible to all.

- The future of healthcare in India is bright. With the right policies and investments, India can become a global leader in healthcare.
